CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (“Directors”) of Golden Meditech Company Limited (“Company” or “Golden Meditech”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief:- 1. the information contained in this report is accurate and complete in all material respects and not misleading; 2. there are no other matters the omission of which would make any statement in this report misleading; and 3. all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

CORPORATE PROFILE

Golden Meditech Company Limited (“Golden Meditech”; stock code: 8180.HK) is a leading hi-tech integrated medical group in China. Its major business areas are medical devices, haematopoietic stem cell storage and applications and Chinese herbal medicines.

Golden Meditech’s flagship product, the Autologous Blood Recovery System, is the first of its kind to receive State Food and Drug Administration (“SFDA”) approval for manufacture in China. The Group also holds one of the only two Umbilical Cord Stem Cell Storage Permits issued by China’s Ministry of Health. The Group has also diversified into Chinese herbal medicine production, and TangHerb® is the first proprietary Chinese medicine approved by the PRC’s SFDA for alleviating AIDS symptoms.

Golden Meditech has a strong commitment to expanding and diversifying its businesses. Through research and development, expansion of its distribution network, investments and acquisitions, the Group aims to become the world’s leading hi-tech integrated medical group.

PERFORMANCE HIGHLIGHTS

Notes:

1. New accounting policies on share based payments and financial instruments were adopted in 2005 and the figures prior to 2004 have not been restated to reflect the new accounting policies.
2. The basic earnings per share of previous years have been restated for the 2004 bonus issue.

THIRD QUARTERLY RESULTS (UNAUDITED)

The board of Directors of the Company is pleased to announce the unaudited consolidated results of the Group for the three months and nine months ended 31 December 2005, together with the comparative unaudited figures for the corresponding periods in 2004 as follows:

NOTES TO THE THIRD QUARTERLY REPORT

1. Basis of preparation

The unaudited results of the Group have been prepared in accordance with the Hong Kong Financial Reporting Standards (“HKFRSs”), which include all Hong Kong Accounting Standards (“HKASs”) and Interpretations issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”), accounting principles generally accepted in Hong Kong and the applicable disclosure requirements of the GEM Listing Rules.

The unaudited consolidated results have been prepared under historical cost convention. All intra-group transactions have been eliminated in preparing these results. The principal accounting policies used in the preparation of the unaudited consolidated results are consistent with those adopted in the preparation of the annual report of the Group for the year ended 31 March 2005, except for those mentioned below.

In the nine months ended 31 December 2005, the Group has adopted, for the first time, a number of new and revised HKFRSs and HKAS (herein collectively referred to as the “new HKFRSs”). The new HKFRSs are effective for the accounting periods beginning on or after 1 January 2005.

The major effects of the adoption of the new HKFRSs on the unaudited consolidated results are set out below:

The adoption of HKFRS 2 “Share-Based Payment” requires an expense to be recognised when the Group buys goods or obtains services in exchange for shares or rights over shares (“equity-settled transactions”), or in exchange for other assets equivalent in value to a given number of shares or rights over shares (“cash-settled transactions”). The main impact of HKFRS 2 on the unaudited consolidated results is the expensing of Directors’ and employees’ share options by using an option-pricing model. Prior to this, the provision of share options to Directors and employees did not result in a charge to the income statement. The Group has taken advantage of the transitional provisions of HKFRS 2 in respect of equity-settled awards and has applied HKFRS 2 only to equity-settled awards granted after 7 November 2002 that had not vested as at 1 January 2005.

The adoption of HKFRS 3 “Business Combination” and HKAS 36 “Impairment of Assets” has resulted in ceasing goodwill amortisation and testing for impairment annually at the cash generating unit level (unless an event occurs during the year which requires the goodwill to be tested more frequently) from 1 April 2005. The transitional provisions of HKFRS 3 require the Group to eliminate the carrying amount of accumulated amortisation with a corresponding decrease in goodwill.

1. Basis of preparation (continued)

The adoption of HKAS 32 "Financial Instruments: Disclosure and Presentation" requires an issuer of a compound financial instrument that contains both liability and equity components to separate the compound financial instrument into its liability and equity components on its initial recognition and to account for these components separately. The principal impact of HKAS 32 on the Group relates to the convertible bonds issued by the Company that contain both liability and equity components.

Both HKFRS 2 and HKAS 32 require retrospective application. Based on the Group's latest assessment, the effect of adopting these two standards has decreased consolidated retained profits as at 1 April 2005 by HK\$4,820,000. In addition, the profits for the three months and nine months ended 31 December 2005 were decreased by HK\$2,008,000 (2004: HK\$1,117,000) and HK\$6,017,000 (2004: HK\$1,790,000) respectively.

Due to the adoption of the new HKFRSs during the period under review, the accounting treatment and presentation of certain items and balances in the unaudited consolidated results of the Group have been revised to comply with the new requirements. Accordingly, certain prior year adjustments have been made and certain comparative figures have been reclassified/restated to conform with the current period's presentation.

2. Turnover

The Group is principally engaged in the manufacture and sale of its autologous blood recovery system ("ABRS"), which includes the machines ("ABRS Machines") and disposable blood processing chambers and related accessories ("Disposable Chambers"), the storage and applications of haematopoietic stem cells, or blood stem cells ("Cord Blood Bank") and the research and development, manufacture and sale of proprietary Chinese medicines in the PRC.

Turnover represents the amounts received and receivable for goods sold and services rendered to customers, less returns, allowances, value added tax, business tax and other sales taxes.

Turnover recognised during the period is analysed as follows:

	Unaudited For the three months ended 31 December		Unaudited For the nine months ended 31 December

5. Taxation (continued)

(i) PRC income tax

The Group's subsidiaries in the PRC are subject to PRC income tax, either at a rate of 33% or a reduced rate of 15%.

In accordance with the relevant tax rules and regulations in the PRC, one of the Group's subsidiaries is fully exempted from PRC income tax until 31 December 2005. For the following three years, it is entitled to a 50% reduction, allowing it to pay PRC income tax at 7.5% until 31 December 2008.

Another subsidiary of the Group is entitled to a 50% reduction, allowing it to pay PRC income tax at 7.5% until 31 December 2006.

(ii) Hong Kong Profits Tax

No provision for Hong Kong Profits Tax has been made for the nine months ended 31 December 2005 (2004: Nil) as the Group did not have assessable profits subject to Hong Kong Profits Tax during the period.

6. Dividend

	Unaudited For the three months ended 31 December		Unaudited For the nine months ended 31 December

9. Post balance sheet events

On 27 January 2006, the Group entered into a conditional acquisition agreement to acquire a 50% equity interest in Beijing Pypo Technology Group Company Limited (“Pypo”), one of the few PRC distributors of a world-famous mobile phone brand. This acquisition will provide a customer base and nationwide sales channel for the Group’s newly developed personal healthcare devices.

The total consideration for the acquisition is RMB 460 million and will be settled in cash from the Group’s internal resources. The acquisition is subject to the fulfilment of certain terms and conditions, including our shareholders’ approval at an extraordinary general meeting (“EGM”).

The Group has paid the vendor a refundable deposit of RMB 57 million in cash as earnest money, which was converted into the first payment of the consideration on 27 January 2006. The second payment, RMB 219 million, is payable within 10 business days after our shareholders approve the acquisition at the EGM. The remaining balance is payable within 12 months from the date the acquisition is completed.

BUSINESS REVIEW

Overview

The Group continued to generate sustainable returns for the reporting period. The Medical Device Segment maintained a healthy growth, while the growth of the Cord Blood Bank Segment continued to accelerate.

The Group was recently chosen for the first time to participate in the Deloitte Technology Fast 500 Asia Pacific 2005 programme, which recognises the Technology, Media and Telecommunications companies with the fastest annual revenue growth in the Asia-Pacific region, including in the PRC, the HKSAR, Australia, India, Japan and Korea. The programme calculates companies' growth over the previous three years and our inclusion is therefore further evidence that our growth is not only robust but also sustainable. We are proud that the Group's hard work is being recognised.

The key to this strong and sustainable growth is the Group's ability to identify and capture market opportunities. Going forward, the Group plans to develop a range of personal healthcare products and services in China. On their eventual launch, we anticipate they will become another growth engine for the Group.

The Medical Device Segment

The flagship product – the Autologous Blood Recovery System (“ABRS”) – continues to dominate the China market. It collects, processes and recycles the blood a patient loses during surgery, replacing traditional blood transfusion methods.

This Segment recorded stable growth during the period under review, with turnover amounting to HK\$183,715,000, an increase of 9% compared with last year. Operating profit from this segment also rose satisfactorily to HK\$130,352,000, an increase of 10% compared to last year. The Group sold approximately 1,590 units of the ABRS Machine and 74,000 sets of Disposable Chambers. The sales of Disposable Chambers continued to rocket and rose over 28% compared with last year, demonstrating the increasing popularity of the ABRS.

To cultivate the personal healthcare market, the Group has been developing a series of lightweight health monitors with advanced sensors and featuring diagnostic and data transmission functions, initially targeted at Bluetooth mobile handset users in China. Customers can send diagnostic data to handsets via Bluetooth for reading and onward transmission. The health monitor devices can assist the growing number of young couples in China, with responsibility for older family members to check their own and their relatives health any time, anywhere.

The Cord Blood Bank Segment

The Cord Blood Bank business provides separation, processing, examination and storage services for the umbilical cord blood stem cells of newborn babies. Its performance has been remarkable since it commenced operations two years ago. The first private cord blood bank operator in China, it is still one of only two authorised operators.

During the reporting period, turnover amounted to HK\$22,056,000, representing a substantial increase of 110% compared with last year, the result of a successful marketing effort and stringent cost control. New customer sign-ups rose from approximately 2,100 in the first three quarters of the previous financial year to approximately 4,300 for the same period this year, a surge of 105%.

The Chinese Herbal Medicine Segment

This segment's flagship product, TangHerb[®], a proprietary Chinese medicine effective in boosting the immune systems of AIDS sufferers, has begun commercial production. However, its sales have not yet been recorded.

The Group intends to develop the overseas market for TangHerb[®] so that more AIDS patients can benefit. To help in obtaining the approval of foreign governments for the sale of TangHerb[®], the Group appointed the Clinical Trials Centre ("CTC") at the University of Hong Kong to audit the clinical trial of TangHerb[®] for quality of trial conduct, and reliability of data and statistical analysis.

After more than six months of detailed study, the CTC issued an audit report in late 2005, confirming that "the clinical trial of TangHerb[®] has been conducted according to international standards, i.e. in line with the Declaration of Helsinki and the ICH GCP Guidelines." In addition the audit "did not identify any major findings that could have influenced the quality of trial conduct, data and statistical analysis." The CTC's professional audit provides strong support and evidence that will enable us to expand the market of TangHerb[®] to other countries.

Major investment

On 27 January 2006, the Group entered into a conditional acquisition agreement to acquire a 50% equity interest in Pypo for a total consideration of RMB 460 million, representing an attractive price/earnings multiple of approximately 7.4 times for Pypo for the year ended 31 March 2005.

Pypo is one of the few PRC distributors of a world-famous mobile phone brand. The Group intends to use Pypo's nationwide consumer product sales network to market its newly developed health monitor devices to target customers, i.e. Bluetooth mobile handset users in China. Pypo's network is ideal for launching and selling our new products, saving huge advertising costs and enhancing cost-effectiveness.

The Group will also benefit from the highly reputable handset brand that Pypo distributes to raise the popularity and acceptance of the new products. Pypo's professional sales team and nationwide sales network will help us secure a substantial market share within the shortest time. Pypo's solid financial position, and its strong cash flow will also enhance the Group's earnings.

PROSPECTS

The Group is committed to delivering impressive results for all shareholders. We will concentrate our resources on expanding our core businesses – seizing the opportunity to enter the personal healthcare market, establishing a nationwide cord blood bank network, and developing both the domestic and overseas markets of TangHerb®.

These goals will not be achieved easily, but management is confident of confronting these challenges and of continuing to create value for our shareholders and to contribute to the welfare of society.

FINANCIAL REVIEW

Overview

During the nine months ended 31 December 2005, the Group reported desirable growth in both turnover and earnings. The increase in turnover was mainly due to the organic growth of the Medical Device and the Cord Blood Bank segments. The Chinese Herbal Medicine Segment has just commenced production and its contribution is not reflected in the reporting period.

Turnover

The Group recorded a turnover of HK\$205,784,000 during the nine months ended 31 December 2005, representing an increase of approximately 15% compared with last year. The Medical Device Segment accounted for 89% of total turnover. The remainder is mainly composed of contributions from the Cord Blood Bank Segment.

Gross profit margin

The Group maintained a gross profit margin of 71% for the reporting period. The management anticipates that the Medical Device Segment's gross profit margin will remain lucrative. However, each of the Group's divisions has a different gross profit margin, and when the Cord Blood Bank and the Chinese Herbal Medicine segments contribution to total turnover rises, the Group's overall gross profit margin will change accordingly.

Selling and administrative expenses

Total selling and administrative expenses for the period were HK\$45,669,000. Share option costs of HK\$4,268,000 were included as a result of adopting the new accounting policies. However, the Group has always been prudent in controlling costs and expenditure, and selling and administrative expenses for the period under review only increased slightly by HK\$3,671,000 compared to the same period last year.

Profit attributable to equity holders of the Company

During the nine months under review, profit attributable to equity holders of the Company amounted to HK\$239,970,000. Despite the unfavourable effect of the new accounting policies, this represented a spectacular increase of 134%. If it were recorded based on the former accounting policies, the growth would be 136%.

The sharp rise in earnings was due to the one-off exceptional gain of HK\$116,571,000 from the deemed disposal of the tumour treatment associate, China Medical Technologies, Inc., following its successful listing on the NASDAQ in the United States in August 2005.

DIRECTORS' AND CHIEF EXECUTIVES' INTERESTS AND SHORT POSITIONS IN THE SHARES AND UNDERLYING SHARES OF THE COMPANY
